# Red's Hot!

By Lauren Hammack

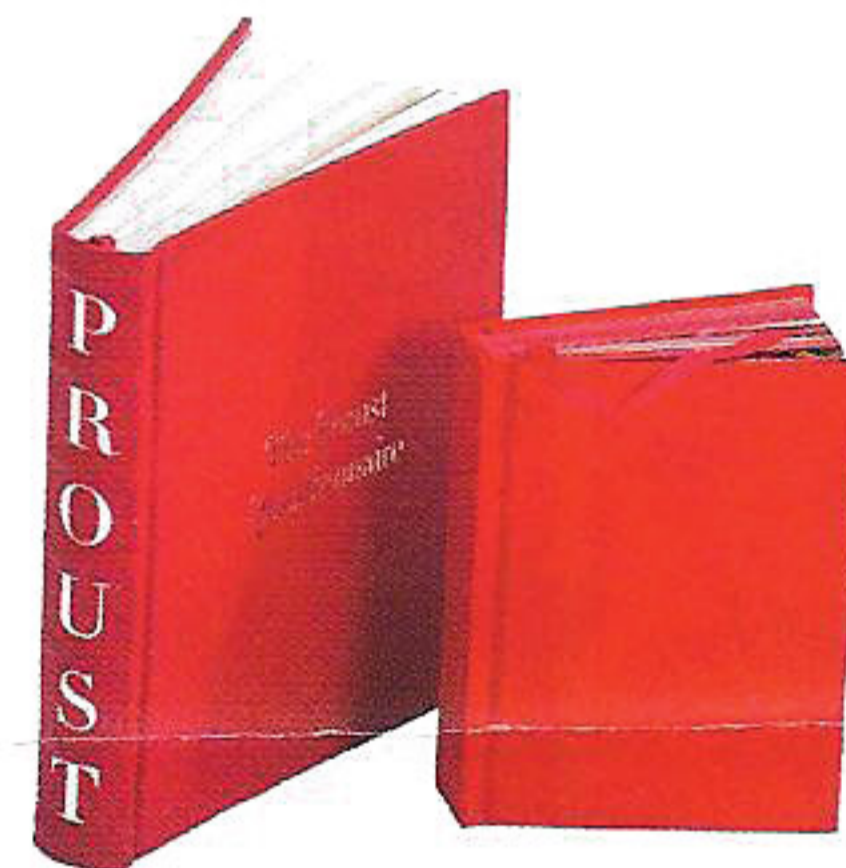

**A**cross the color spectrum, one color diverts the eyes a moment longer than any other: red. Symbolically speaking, red conveys our most intense emotions – love, passion, strength, courage, happiness. The faint of heart need not apply where red is concerned – it's a color that leaves no room for ambivalence.

In all its sublime, transformative incarnations, red is the undisputed color of unity and hope, two themes worth celebrating as we look forward to the 19<sup>th</sup> annual Red Tie Night, Saturday, March 5, benefiting the Oklahoma AIDS Care Fund. With that date circled on our calendars – in red, of course – we've chosen a few of our favorite red things to get the festivities started.

## Seeing Red
